Dear Resident:

Over the years, rapid growth in Avalon and the surrounding communities has caused the existing Peermont Substation (Located between Ocean and Dune Drives from 60th and 61st Streets) to approach near capacity levels. Rebuilding the existing substation will give us the needed capacity to meet future demands for electricity and will allow us to continue to provide safe and reliable services to all customers for the foreseeable future. This project is one of many that Atlantic City Electric is working on to improve future overall reliability in South Jersey.

Presently, we are in the design phase of this reliability improvement project and we will be reviewing our plans with the municipal officials and the public throughout this process. Please join us at the next AHLOA Avalon Home and Land Owners Association meeting to learn how Atlantic City Electric is taking steps to improve the quality of electric service in Avalon and the surrounding areas by rebuilding the existing substation. The meeting will be held on Saturday, September 14, at 10:00 am at Avalon Community Hall, 30th Street and the beach, where Atlantic City Electric personnel will give a presentation regarding this project and answer any questions you may have.

Atlantic City Electric is committed to providing customers with safe, reliable and cost effective service. We look forward to working with the municipal officials and residents on our reliability improvement project. If you have any questions, please contact me directly at 609-463-3805.

Sincerely,

Ronnie Town
